Summary

Backend-focused CSE undergrad; Spring Boot · PostgreSQL · Firebase; internship at Walton Hi-Tech PLC.

Experience

Intern - Walton Hi-Tech Industries PLC (October 2025 - November 2025)

- Designed ER model, data flow diagrams, and SRS for a requisition management system serving internal procurement workflows.
- Developed CRUD REST APIs for database entities using Spring Boot and PostgreSQL.

Thesis

Restorable Speaker Anonymization via Conditional Invertible Neural Networks GitHub

- Implemented a cINN-based speech anonymization system that conceals speaker identity while preserving linguistic content and prosody, with lossless key-based restoration using shared inverse weights.
- Built the full two-stage pipeline in PyTorch — INN-based condition generator, coupling blocks with RRDB sub-nets, and a combined consistency + triplet objective — trained on VCTK and LibriTTS.

Projects

Altruist GitHub YouTube

- Full-stack NGO–volunteer platform with donation request workflows, real-time progress tracking, and a placeholder payment pipeline.
- Built with React and Firebase for auth, real-time DB, and hosting.

Unbiased GitHub YouTube

- News bias detection platform with AI-powered article analysis and an LLM chatbot for real-time rumor verification.

Education

2022 - present	BSc (CSE) at **Islamic University of Technology**	(CGPA:3.65/4)
2021	HSC at **Dhaka Residential Model College**	(GPA: 5.0/5.0)
2019	SSC at **Dhaka Residential Model College**	(GPA: 5.0/5.0)

Skills

Programming Language:	JavaScript, Java, C++, Python, SQL
Frameworks & Libraries:	Spring Boot, ReactJS, Node.js, Firebase, PyTorch
Tools:	PostgreSQL, MySQL, Git
